REPORT OF THE CENSUS OF MANITOBA, TAKEN IN 1886.

To His Excellency the Most Honorable Sir Henry Charles Keith Petty-Fitzmaurice, Marquis of Lansdowne, in the County of Somerset, Earl of Wycombe, of Chipping Wycombe, in the County of Bucks, Viscount of Caln and Calnstone, in the County of Wilts, and Lord Wycombe, Baron of Chipping Wycombe, in the County of Bucks, in the Peerage of Great Britain; Earl of Kerry and Earl of Shelburne; Viscount Clanmaurice and Fitzmaurice, Baron of Kerry, Lixnaw and Dunkerron, in the Peerage of Ireland; Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George; Governor General of Canada, and Vice Admiral of the same, &c., &c., &c.

May it please Your Excellency,—

I have the honour to submit the Report of the Census of Manitoba, taken on the 31st July, 1886.

The whole respectfully submitted.

JOHN CARLING,
Minister of Agriculture.

Department of Agriculture,
Ottawa, August, 1887.

RAPPORT DU RECENSEMENT DE MANITOBA, PRIS EN 1886.

A Son Excellence le Très-Honorable Sir HENRY CHARLES KEITH PETTY FITZMAURICE, Marquis de Lansdowne, dans le comté de Somerset, Comte de Wycombe, de Chipping Wycombe, dans le comté de Bucks, Vicomte Calne et Calnstone, dans le comté de Wilts, et Lord Wycombe, Baron de Chipping Wycombe, dans le comté de Bucks, dans la pairie de la Grande-Bretagne; Comte de Kerry et Comte de Shelburne, Vicomte Clanmaurice et Fitzmaurice, Baron de Kerry, Lixnaw, et Dunkerron, dans la pairie d'Irlande; Chevalier Grand-Croix de Notre Ordre Très Distingué de Saint-Michel et Saint-George; Gouverneur Général du Canada, et Vice-Amiral d'icelui.

QU'IL PLAISE A VOTRE EXCELLENCE.—

J'ai l'honneur de soumettre le rapport du recensement de Manitoba, pris le 31 juillet, 1886.

Le tout respectueusement soumis.

JOHN CARLING,
Ministre de l'Agriculture.

Département de l'Agriculture,
OTTAWA, août 1887.

CANADIAN STATISTICS.

MANITOBA CENSUS, 1886.

To the Honorable JOHN CARLING,
Minister of Agriculture.

SIR,—I have the honour to lay before you the Report of the Manitoba Census, for the year 1886.

A detailed statement, concerning the organization and labour of this Census, will be found in the Introduction to the Report.

I have the honour to be, Sir,
Your obedient servant,
E. H. ST. DENIS.
Acting Statistical Officer.

Department of Agriculture,
OTTAWA, August, 1887.

STATISTIQUES DU CANADA.

RECENSEMENT DE MANITOBA, 1886.

A l'honorable JOHN CARLING,
Ministre de l'agriculture.

MONSIEUR,—J'ai l'honneur de vous soumettre le rapport du recensement de Manitoba, pour l'année 1886.

Vous trouverez, dans l'introduction au rapport, un état détaillé de l'organisation et des travaux de ce recensement.

J'ai l'honneur d'être, monsieur,
Votre obéissant serviteur,
E. H. ST. DENIS,
f. fs. d'Officier de la Statistique.

Département de l'agriculture,
OTTAWA, août 1887.

MANITOBA CENSUS, 1886.

INTRODUCTION.

This Census was taken under authority of the Act 48 Victoria, Cap. III, assented to on the 1st May, 1885.

The information which relates to population is a statement of facts in existence at the time appointed for the taking of the census, on the 31st July, 1886; all other information relating to products refers to the period of twelve months immediately preceding that date.

This report is accompanied by tables giving ratios, between districts, of population and products; also by a comparative statement of the two Censuses of 1881 and 1886, showing the progress made by the Province during these five years.

Since the Census of 1881 was taken, the Province of Manitoba has been reduced in area by about one-half, through the annexing to Ontario and Keewatin of that portion of territory lying east of Lake of the Woods, and which was then called the "Manitoba Extension."

For the purpose of establishing comparisons between the two Censuses, the figures referring to the above annexed territory were deducted from the general result of the Census of 1881.

As in previous Censuses, the *population de droit* or *de jure* system was adopted for the enumeration of the people.

Recourse was had to the returns in the Indian Office, in order to obtain information respecting the Indian population receiving pay under the treaties; and figures were taken from the registers kept. This course was necessary owing to the nomadic habits of the Indians, and to the fact that few of the enumerators were able to speak their language. Those Indians, however, which did not receive pay under the treaties were enumerated in the same manner as the whites.

It should be explained that the registers in the Indian Office do not contain all the details which are called for by the Census schedules,

RECENSEMENT DE MANITOBA, 1886.

INTRODUCTION.

Ce recensement a été fait sous l'autorité de l'Acte sanctionné le 1er mai, 1885. (48 Vic., chap. III.)

Les renseignements contenus dans ce rapport, quant à la population, sont un exposé des faits tels qu'ils existaient à la date fixée pour la prise du recensement, (31 juillet 1886). Les autres renseignements ayant trait aux produits se rapportent à l'année finissant le 31 juillet susdit.

On trouvera à la fin de ce rapport des tableaux donnant des proportions arithmétiques, entre les districts, sur la population et les produits ; et de plus un tableau comparatif des deux recensements de 1881 et 1886, montrant le progrès fait par la province, durant ces cinq années.

Depuis le recensement de 1881, la superficie de la province de Manitoba a été réduite d'une moitié, à peu près, par l'annexion à Ontario et à Kéwatin, de cette partie du territoire situé à l'est du Lac des Bois, et appelée alors "Extension de Manitoba." Afin d'établir les différentes comparaisons, entre les deux recensements, par rapport à la superficie actuelle de la province, les chiffres se rapportant au territoire annexé plus haut mentionné, ont été soustraits du résultat général du recensement de 1881.

Comme dans les recensements précédents, le système adopté pour le dénombrement de la population est celui de la *population de droit.*

Le dénombrement des Sauvages, cependant, à l'exception du petit nombre de ceux ne recevant pas d'annuité du gouvernement, a été fait d'après les rapports du Bureau des Sauvages. Il est presqu'impossible d'énumérer les Sauvages de la même manière que les blancs, vu que la plupart des énumérateurs ne parlent pas leurs langues, et à cause de leurs habitudes errantes ou nomades. Les rapports du Bureau des Sauvages, auquels on a eu recours pour obtenir les renseignements concernant la population aborigène, ne s'appliquent qu'aux Sauvages de Traités ayant droit de recevoir l'annuité du gouvernement, et pour laquelle ces régistres sont tenus.

and this explains why the information concerning the ages, the conjugal condition and the religions of the Indians has been left out of the present report.

Other information, such as that relating to furs, fisheries, &c., is furnished by the returns of the Indian Office, but in a different form from the Census schedules: the value instead of the quantity being given in each case.

The topography of the several Reserves situated in the Province was carefully established, and the population as well as the quantity of products returned by the Indian Office, were added to the returns made by Census enumerators, each Reserve within its respective municipality or sub-district.

The Province was divided into five districts, for Census purposes, corresponding exactly with the five Electoral Districts of Selkirk, Marquette, Provencher, Lisgar and Winnipeg. These five districts were in turn divided into one hundred and six sub-districts, in accordance with the Manitoba Statutes (47 Victoria, Cap. XI).

The organization and superintendence of the Census was confided to Mr. E. H. St. Denis, Acting Statistical Officer, who went to Winnipeg in order to instruct and initiate the several Census officers in their respective duties. The Census staff consisted of Mr. Stewart Mulvey, as staff officer for the Province, and the following gentlemen, as commissioners for the five Districts: Messrs. C. Cliff, E. McDonald, J. E. Têtu, John MacBeth, M.P.P., and H. S. Donaldson. In addition, eighty-nine enumerators were appointed for the several sub-districts comprised in the Province.

Every one of these officers, besides having been supplied with a manual containing the Census Act and the necessary instructions for the taking of the Census, as well as with a set of specimen schedules, to be used as a guide in making entries, underwent a course of oral instructions; so that when the time came for the taking of the Census everyone was thoroughly acquainted with the work to be performed; as a result of this the returns were all received in a very satisfactory condition

The schedules used for the enumeration were five in number.

Schedule 1 contained twenty-two columns of information into which were registered the name, the age, the place of birth, the religion and the origin of every person enumerated; also the residence, the conjugal condition and the occupation of every family, together with the number of children going to school and the number of persons afflicted with infirmities, such as Blind, Deaf and Dumb, Unsound of Mind.

Ces rapports ne contiennent pas, cependant, tous les renseignements compris dans les tableaux du recensement ; et ce fait explique comment les informations concernant les âges, l'état de mariage et les religions des Sauvages ne sont pas données dans le présent rapport. D'autres renseignements, tels que ceux concernant les fourrures et la pêche y sont donnés, mais sous une forme différente de celle du recensement, la valeur et non la quantité de ces produits étant rapportée dans chaque cas.

La topographie des différentes Réserves situées dans la province a été soigneusement établie, et la population ainsi que les produits divers dont il a été fait rapport par le Bureau des Sauvages, ont été ajoutés aux rapports des énumérateurs du recensement, chaque Réserve dans sa municipalité ou son sous-district respectif.

Pour les fins du recensement, la province a été divisée en cinq districts correspondant en tous points aux cinq districts électoraux suivants : Selkirk, Marquette, Provencher, Lisgar et Winnipeg : ces cinq districts ont été à leur tour divisés en cent six sous-districts, en conformité de la loi de Manitoba.—47 Victoria, chap. XI.)

L'organisation ainsi que la direction de tous les travaux du recensement ont été confiées à Monsieur E. H. St. Denis, faisant fonctions d'officier de la statistique, qui se rendit à Winnipeg pour y instruire les officiers du recensement et les initier dans leurs fonctions respectives. Le personnel chargé de faire le dénombrement, se composait de monsieur Stewart Mulvey, comme officier en chef pour la province, et de MM. C. Cliff, E. McDonald, J. E. Têtu, John MacBeth, M.P.P., et H. S. Donaldson, comme commissaires pour les cinq districts plus haut mentionnés ; de plus, quatre-vingt-neuf énumérateurs pour les différents sous-districts compris dans la province.

Chacun de ces officiers, après avoir été muni d'un manuel d'instructions contenant la loi du recensement, ainsi qu'un Cahier-Exemple devant servir de modèle aux énumérateurs pour procéder à l'enrégistrement, eut à subir un cours d'instructions orales. De cette manière tous étaient parfaitement au fait de leur besogne quand vint la date fixée pour la prise du recensement, et le résultat obtenu a été en effet des plus satisfaisants.

Les cahiers dont on a fait usage pour le dénombrement étaient au nombre de cinq.

Le cahier No. 1 contenait vingt-deux colonnes de renseignements, dans lequel ont été enregistrés le nom, l'âge, le pays de naissance, la religion et la nationalité de chaque personne, avec la demeure, l'état de mariage et l'occupation de chaque famille ; de plus le nombre des enfants allant à l'école et celui des personnes affligées d'infirmités, telles que aveugles, sourds-muets et aliénés.

The number of Public Institutions with their inmates and the number of Industrial Establishments were registered in Schedule 2.

Schedule 3 contained twenty-seven columns for the purpose of registering the quantity of land occupied and cultivated, also the quantity of grain and other field products harvested during the year 1885.

In Schedule 4 the live stock and farm products, as well as the quantity of furs and pelts were registered.

In the last Schedule was registered information relating to Shipping, Fisheries and Products of the Forest.

These five Schedules, enclosed in a portfolio, were filled up by the enumerators going from house to house, each within his enumeration division.

REMARKS ON THE SEVERAL TABLES CONTAINED IN THIS REPORT.

Table I shows with the area for each district, the number of dwellings, the number of families, the population by sexes and the conjugal condition of the people, for each sub-district. In the columns headed "Married," "Widowed" and "Children and Unmarried," the Treaty Indians, for reasons already given, were not counted.

Table II comprises the religions, and the figures given in the last column, headed "not given," refer mostly to Treaty Indians.

Table III gives the origins of the people, and needs no further explanation than the pointing out of the fact that in previous Censuses no special notice was taken regarding the origin of Half-Breeds; the French Half-Breed, the Scotch Half-Breed, &c., were then returned as "French," "Scotch," &c., and were, as a matter of course, classed with the whites.

Table IV needs no explanation.

Table V gives the ages of the people as they were recorded by the enumerators; the column headed "Under one year," being a greater or lesser fraction of one year, and the columns headed 1 to 2, 2 to 3, &c., represent the number of persons living in the Province on the day appointed for the taking of the Census, at one year of age last birthday, two years of age last birthday, &c., the column headed "Not given," in this table, is also composed of all the Treaty Indians, besides a number of whites, whose ages could not be obtained by the enumerators.

Dans le cahier No. 2 ont été enregistrés les renseignements concernant les Institutions Publiques et les Etablissements Insdustriels, avec le nombre de personnes internées dans chaque institution et le nombre de personnes employées dans les différentes industries.

Dans le cahier No. 3, contenant vingt-sept colonnes, ont été enregistrés le nombre d'acres de terre occupés et le nombre d'acres sous culture, avec la quantité de grain et autres produits des champs, récoltés durant l'année 1885.

Dans le cahier No. 4, le nombre d'animaux et la quantité de produits de ferme, ainsi que les pelleteries et fourrures ont été enregistrés.

Dans le cinquième et dernier cahier, les renseignements concernant la navigation et la pêche, ainsi que les produits de la forêt ont été enregistrés.

Ces cinq cahiers, renfermés dans un portefeuille, ont été remplis par les énumérateurs allant de maison en maison, chacun dans sa division respective.

REMARQUES SUR LES TABLEAUX CONTENUS DANS CE RAPPORT.

Le Tableau I donne, avec la superficie de chaque district, la population, le nombre de familles, le nombre de demeures, ainsi que l'état de mariage de la population, pour chaque sous-district. Les Sauvages des Traités, pour les raisons déjà mentionnées, ne sont pas compris dans les colonnes ayant les en-têtes suivantes : "Mariés," "Veuvage," et "Enfants et non mariés."

Le Tableau II, a trait aux différentes religions. Les chiffres contenus dans la dernière colonne de ce tableau se rapportent presque totalement à la population sauvage.

Le Tableau III a rapport aux nationalités ; une seule remarque suffira pour ce tableau, et elle s'applique aux Métis ; dans les recensements précédents, les "Métis Français," les "Métis Ecossais," etc., ont été enregistrés comme étant d'origine "Française," "Ecossaise," etc., et ont été par conséquent classés parmi les blancs.

Le Tableau IV ne demande aucune explication.

Le Tableau V contient les âges tels qu'ils ont été enregistrés par les énumérateurs. La colonne portant pour en-tête : "Au-dessous d'un an," étant une plus ou moins grande partie d'un an, tandis que les colonnes marquées respectivement 1 à 2, 2 à 3, etc., représentent le nombre de

Tables VI, VII, VIII, IX and X require no special explanation, except a word respecting table VIII, in which, it will be observed, the number of persons afflicted with blindness is rather small compared to that reported by the Census of 1881; this is accounted for by the fact that the infirmities of Indians were given in that Report while they are left out of the present one.

Table XI gives the occupations of the people, arranged by classes. It will be noticed, on comparing the figures of this table with those of the corresponding table for the Census of 1881, that the number of occupations comprised in the category of the "Not classified," was larger in 1881 than it is in 1886, on account of the occupations of Indians not having been reported in the present Census, while they were mostly all recorded as Hunters and Fishermen in the previous one. In the classification of 1881, the farm labourers were also put amongst the "Not classified" while they are in the present report with the "Agricultural class."

Tables XII, XIII, XIV and XV require no special explanation.

Table XVI is a statement of the number of fur-bearing animals caught or killed by hunters or others during the Census year. The quantity of furs and pelts, as given in this table, is not to be taken, however, as the actual number of animals caught or killed in the sub-district into which they were registered, as the greater part of these furs and pelts were returned by hunters and traders, whose hunting and trading operations extended beyond the limits of their sub-districts, and sometimes from one end of the Province to the other.

Particular care was taken in order to avoid double registration of furs and pelts, which might have occurred by getting the same information from two different sources: from the hunter first and then from the trader. As already explained above, the returns of the Indian Office only give the value and not the quantity of furs and pelts, which value, for all the Indian Reserves of the Province, amounts to $28,680, the greater part of which was of course sold to Traders, who made a return of the same to enumerators.

Table XVII deals with Shipping, Fisheries and Products of the Forest, and requires a word of explanation:—The "Census Standard" log represents 100 feet (board measurement). With regard to that part of this table, which relates to Fisheries, the remarks which were made in the preceding table about the collection of furs and pelts, may also be applied to fish, with this difference, however, that the fish caught by Treaty In-

personnes demeurant dans la province, lors de la prise du recensement, à l'âge de un an au dernier anniversaire, de deux ans au dernier anniversaire, etc. La colonne marquée "Non donnés" comprend tous les Sauvages des Traités ainsi qu'un certain nombre de blancs dont les âges n'ont pu être obtenus par les énumérateurs.

Les Tableaux VI, VII, VIII, IX et X ne demandent aucune explication, excepté un mot sur les âges des aveugles, Tableau VIII. En comparant les chiffres de ce tableau avec ceux du tableau correspondant pour 1881, on remarquera en effet que le nombre des aveugles y est moindre qu'il ne l'était en 1881; ceci s'explique par le fait que les infirmités des Sauvages, rapportées dans le recensement de 1881, ne sont pas comprises dans le présent rapport.

Le Tableau XI contient les occupations disposées par classes. Si l'on compare encore les chiffres de ce tableau avec ceux du tableau correspondant, pour le recensement de 1881, on verra que le nombre des occupations comprises dans la catégorie des "Non classifiées," était plus élevé en 1881 qu'il ne l'est dans le présent rapport; la cause de ceci, c'est que les occupations des Sauvages, presque tous enregistrés comme chasseurs ou pêcheurs en 1881, n'ont pas été rapportées dans le recensement de 1886. Les "Journaliers de ferme" ont aussi été, contrairement à la classification de 1881, séparés d'avec les "Journaliers" et mis dans la catégorie plus appropriée de la "Classe Agricole."

Les Tableaux XII, XIII, XIV et XV n'ont besoin d'aucune explication.

Le Tableau XVI contient un état du nombre d'animaux à fourrure, tués ou pris par les chasseurs ou autres, durant l'année du recensement. La quantité des pelleteries et des fourrures, telle que donnée dans ce rapport, ne représente pas, effectivement le nombre d'animaux tués ou pris dans le sous-district même dans lequel les renseignements ont été obtenus, vu que la plupart de ces renseignements ont été donnés par des personnes dont les opérations, comme chasseurs ou traiteurs, s'étendent au delà des limites de leurs sous-districts, et souvent même d'un bout de la province à l'autre.

Des soins particuliers ont été apportés par les énumérateurs dans l'enregistrement des fourrures, afin d'éviter qu'elles ne fussent inscrites deux fois, chose qui aurait pu arriver en obtenant le même renseignement de deux personnes différentes : du chasseur d'abord et du traiteur ensuite. Comme il est dit plus haut, le rapport du Bureau des Sauvages donne la valeur et non la quantité des fourrures; cette valeur pour toutes les

dians was principally all consumed by themselves, and not sold, as in the case of furs and pelts, to traders and others.

The total value of fish caught by Treaty Indians, as reported by the Indian Office, amounts to $24,580.

Table XVIII is a statement of all Industrial Establishments, in operation in the Province, except those small domestic industries such as cloth making, furniture and carriage building and reparing, &c., exercised individualy by farmers or others, for their own use. A certain number of establishments do not employ, during the whole year, the number of hands returned, and, therefore, the amount given for wages is not to be taken here as having been paid for the year, as some of these industries are only in operation for a part of that time.

Tables XIX, XX, XXI and XXII need no other explanation than those already given on the first page of this Introduction.

Réserves comprises dans la Province, s'élève à $28,680. Il va sans dire que les fourrures ainsi évaluées ont été presque toutes vendues aux traiteurs qui, eux, en ont fait rapport aux énumérateurs.

Le Tableau XVII a trait à la Navigation, aux Pêcheries et aux Produits de la Forêt. Un mot suffira pour expliquer le mesurage des billots ; chaque billot d'après l'*étalon de recensement* comprend 100 pieds de bois, mesure de planche. Quant à la partie de ce tableau qui a trait aux pêcheries, les remarques faites sur le tableau précédent au sujet des fourrures et des pelleteries peuvent lui être appliquées, avec cette différence, cependant, que le poisson pris par les Sauvages des Traités a été consommé en grande partie par eux-mêmes, et non vendu, comme les fourrures et les pelleteries, aux traiteurs ou autres.

La valeur totale du poisson pris par les Sauvages des Traités, d'après le rapport du Bureau des Sauvages, s'élève à $24,580.

Le Tableau XVIII donne un état de tous les établissements industriels, en opération dans la Province, à l'exception cependant, des industries domestiques, telles que le tissage des étoffes, la confection des meubles et des voitures, etc., exercées individuellement par les cultivateurs ou autres pour leur utilité personnelle. Plusieurs établissements n'emploient pas durant l'année entière le nombre d'employés enregistrés dans ce tableau, et par conséquent le montant payé pour gages ne doit pas être pris ici comme l'ayant été pour les douze mois indiqués, vu qu'un grand nombre de ces industries ne sont en opération que bien peu de temps durant l'année.

Les Tableaux XIX, XX, XXI et XXII n'ont pas besoin d'autres explications que celles déjà données à la première page de cette Introduction.

TABLE ANALYTIQUE DES MATIERES.

ANALYTICAL

TABLE OF SUBJECTS

A

	Pages.
Aborigines, population of	18, 20, 22
Acreage, field products	136 to 141
" hay	137, 139, 141
" lands broken, fall 1885 and spring 1886	121, 123, 125
" " owned	121, 123, 125
" " occupied and cultivated, increase from 1881 to 1886	191
Acres cultivated and occupied, number of	121, 123, 125
" of occupied and unoccupied land to a person	182
" seeded in 1885	121, 123, 125
Adventists, number of persons of this persuation	10, 12, 14
" ratio to 1,000 of the population	182
Aerated Water making	160
" " increase from 1881 to 1886	192
African, increase of African population from 1881 to 1886	189
" origin, ratio to 1,000 of the population	184
" population of African origin	18, 20, 22
Ages of blind	100
" married persons	84 to 89
" the people	34 to 81
" the unsound of mind	100
" widowers and widows	92 to 97
Aggregate value of all industries	167
Agricultural Class of occupations, increase from 1881 to 1886	190
Anglican Church, number of member of the	10, 12, 14
Animals and animal products	128 to 133
" increase from 1881 to 1886	191
" number of working	128 to 133
" products, lands, average quantity per family	170 to 175
Antelope, deer, &c., skins of	145, 147, 149
Areas, dwellings, families, population, sexes, conjugal condition, increase from 1881 to 1886	188
" for each district of Manitoba, in square miles	2, 4, 6
Authority for taking the Manitoba census	xii
Average quantity of lands, products and animals per family	170 to 175
Axle grease works	160

B

Bakeries	160
" increase from 1881 to 1886	190
Baking Powder making	160
Baptist Churches, increase from 1881 to 1886	190
" increase of the members of Baptist religion, from 1881 to 1886	188
